

This week Class Three are learning their tables, they are learning the place value of different digits, and learning the difference between positive and negative numbers, in mathematics.

In English we are setting up the guided reading groups, Year Six will be studying Varjak Paw, Year Five will be reading Top Speed and Year Four will be reading Escape From Colditz. The class text for this week is 'Fox', we will be using this to study narrative writing.

The homework for this week is to learn all tables groups, the children have table books, table squares and envelopes with laminated numbers, they need to bring these every day this week so that we can keep learning them in class. The children are expected to read for 20 minutes each night and to write a note in their reading record, including any difficult words that they don't know. They have spelling books with an initial set of words to learn.
