

Curricular information for week beginning: 17th September 2018 Class Three

Maths

Next week we will be continuing to teach Place Value to all children in the class, this will involve ordering and comparing numbers and knowing the value of each digit in a number. We will be using the greater and less than symbols to compare numbers in Year Four, in Year Five we will be reading, writing and ordering numbers up to 1 million. Year 6 will be doing the above and also learning the place value of 2 and 3 place decimals and how to round numbers to a different number of decimal places. We will also be starting to teach addition and subtraction techniques within this place value work.

English

We are moving on from the lovely story of 'Fox', which we've enjoyed and progressing onto a special abridged version of 'The Jungle Book.' We will be working on using a combination of dialogue and speech to introduce the setting and scene and to develop characters.

Guided Reading:

We are continuing with 'Top Speed' and 'Great Escapes', we have chosen to study 'Harry Potter' as the guided reading text for the Year Sixes.

We are following the support for spelling program and Phase 5 letters and sounds.
